1 Corporate information

Vijaywada Bypass Project Private Limited (the Company) is domiciled in India and incorporated on 15th May, 2020 under the provisions of the Companies Act, 2013 as a subsidiary of Adani Enterprises Limited. The Company is presently in the business to carry out the development, maintenance and management of the project "Six laning of Vijaywada Bypass from Gollapudi (Design Ch. 30+000) to Chinnakakani (design Ch. 47+881) including major bridge across river Krishna in Vijaywada Gundugolanu section of NH-16 under Bharatmala Pariyojana on Hybrid Annuity Mode (Pkg. IV)".

The financial statements were authorised for issue in accordance with a resolution of the directors on 3rd May, 2021.

2 Significant accounting policies

2.1 Basis of preparation

The financial statements of the Company have been prepared in accordance with Indian Accounting Standards (Ind AS) notified under section 133 of the Companies Act, 2013 read with the Companies (Indian Accounting Standards) Rules, 2015, as amended and other relevant provisions of the Act.

The Financial statements have been prepared and presented under the historical cost convention with the exception of certain assets and liabilities that are required to be carried at fair values by Ind AS. Fair value is the price that would be received to sell an asset or paid to transfer a liability in an orderly transaction between the market participants at the measurement date.

The Financial Statements are presented in INR.

2.2 Summary of significant accounting policies

a Property, plant and equipment

i. Recognition and measurement

All the items of property, plant and equipment are stated at historical cost net off Cenvat credit less depreciation. Historical cost includes expenditure that is directly attributable to the acquisition of the items.

Cost of an item of property, plant and equipment comprises its purchase price, including import duties and non-refundable purchase taxes, after deducting trade discounts and rebates, any directly attributable cost of bringing the item to its working condition for its intended use. The cost of a self-constructed item of property, plant and equipment comprises the cost of materials and direct labour, any other costs directly attributable to bringing the item to working condition for its intended use, and estimated costs of dismantling and removing the item and restoring the site on which it is located.

ii. Subsequent measurement

Subsequent costs are included in the asset's carrying amount or recognised as a separate asset, as appropriate, only when it is probable that future economic benefits associated with the item will flow to the Company and the cost of the item can be measured reliably. The carrying amount of any component accounted for as a separate asset is derecognized when replaced. All other repairs and maintenance are charged to profit or loss during the reporting period in which they are incurred.

iii. Depreciation

Depreciation is recognised based on the cost of assets less their residual values over their useful lives, using the straight-line method. The useful life of property, plant and equipment is considered based on life prescribed in schedule II to the Companies Act, 2013 except otherwise stated.

iv. Derecognition

An item of property, plant and equipment is derecognized upon disposal or when no future economic benefits are expected to arise from the continued use of the asset. Any gain or loss arising on the disposal or retirement of an item of property, plant and equipment is determined as the difference between the sales proceeds and the carrying amount of the asset and is recognised in profit or loss.

b Financial Instruments

Financial assets and financial liabilities are recognised when an entity becomes a party to the contractual provisions of the instruments.

Financial assets and financial liabilities are initially measured at fair value. Transaction costs that are directly attributable to the acquisition or issue of financial assets and financial liabilities (other than financial assets and financial liabilities at fair value through profit or loss) are added to or deducted from the fair value of the financial assets or financial liabilities, as appropriate, on initial recognition. Transaction costs directly attributable to the acquisition of financial assets or financial liabilities at fair value through profit or loss are recognised immediately in profit or loss.

c Financial assets

Initial recognition and measurement

All financial assets, except investment in subsidiaries and associates are recognised initially at fair value.

Subsequent measurement

For purposes of subsequent measurement, financial assets are classified:

i) At amortised cost

Loans and receivables are non-derivative financial assets with fixed or determinable payments that are not quoted in an active market and which are not classified as financial assets at fair value through profit or loss or financial assets available-for-sale. Subsequently, these are measured at amortized cost using the effective interest method less any impairment losses. These include trade receivables, finance receivables, balances with banks, short-term deposits with banks, other financial assets and investments with fixed or determinable payments.

ii) At fair value through Other comprehensive income (FVOCI)

A financial asset is measured at FVOCI if it meets both of the following conditions and is not designated as at FVTPL:

- the asset is held within a business model whose objective is achieved by both collecting contractual cash flows and selling financial assets; and
- the contractual terms of the financial asset give rise on specified dates to cash flows that are solely payments of principal and interest on the principal amount outstanding.

At present the Company does not have any assets that are classified as Fair value through other comprehensive income (FVOCI)

iii) At fair value through profit or loss (FVTPL)

Financial assets which are not measured at amortised cost are measured at FVTPL.

Fair value changes related to such financial assets including derivative contracts like forward currency contracts, cross currency swaps, options, interest rate futures and interest rate swaps to hedge its foreign currency risks and interest rate risks, are recognised in the statement of profit and loss.

Derecognition of Financial Assets

On derecognition of a financial asset in its entirety, the difference between the asset's carrying amount and the sum of the consideration received and receivable and the cumulative gain or loss that had been recognised in other comprehensive income and accumulated in equity is recognised in profit or loss if such gain or loss would have otherwise been recognised in profit or loss on disposal of that financial asset.

Impairment of Financial Assets

A financial asset is assessed at each reporting date to determine whether there is an objective evidence which indicates that it is impaired. A financial asset is considered to be impaired if an objective evidence indicates that one or more events have a negative effect on the estimated future cash flows of that asset.

The Company applies expected credit loss (ECL) model for measurement of impairment loss on the following financial assets and credit risk exposure:

- a) Financial assets that are debt instruments, and are measured at amortised cost e.g. loans, debt securities, deposits, trade receivables and bank balances
- b) Trade receivables or any contractual right to receive cash or another financial asset that result from transactions that are within the scope of Ind AS 11 and Ind AS 18

For recognition of impairment loss on other financial assets and risk exposure, the Company determines that whether there has been a significant increase in the credit risk. If credit risk has not increased significantly, 12 month ECL is used to provide for impairment loss. However, if credit risk has increased significantly, lifetime ECL is used.

ECL is the difference between all contracted cash flows that are due to the Company in accordance with the contract and all the cashflows that the Company expects to receive, discounted at the original EIR. ECL impairment loss allowance (or reversal) recognised during the period is recognised as expense / (income) in the statement of profit and loss.

d Service Concession Arrangements

Service Concession Arrangements (SCA) refers to the arrangement between the grantor (a public sector entity) and the operator (a private sector entity) to provide services that give the public access to major economic and social facilities utilizing private sector funds and expertise.

With respect to the SCA, revenue and costs are allocable between those relating to the construction services and those relating to operation and maintenance services, and accounted for separately. The infrastructures used in a concession are classified as intangible asset or a financial asset, depending on the nature of the payment entitlements under the SCA. When the company has unconditional right to receive cash or another financial asset from or at the direction of the grantor, such right is recognised as a financial asset and is subsequently measured at amortised cost. When the demand risk is with the company and it has right to charge the user for use of facility, the right is recognised as an intangible asset and is subsequently measured at cost less accumulated amortization and impairment losses. The intangible asset are amortised over a period of SCA.

e Financial liabilities and equity instruments

Classification as debt or equity

Debt and equity instruments issued by the Company are classified as either financial liabilities or as equity in accordance with the substance of the contractual arrangements and the definitions of a financial liability and an equity instrument.

Equity instruments

An equity instrument is any contract that evidences a residual interest in the assets of an entity after deducting all of its liabilities. Equity instruments issued by the Company are recognised at the proceeds received, net of direct issue costs.

Financial liabilities

All financial liabilities are measured at amortised cost using the effective interest method or at FVTPL.

Financial liabilities at amortised cost

Financial liabilities that are not held-for-trading and are not designated as at FVTPL are measured at amortised cost at the end of subsequent accounting periods. The carrying amounts of financial liabilities that are subsequently measured at amortised cost are determined based on the effective interest method. Interest expense that is not capitalised as part of costs of an asset is included in the 'Finance costs' line item.

The effective interest method is a method of calculating the amortised cost of a financial liability and of allocating interest expense over the relevant period. The effective interest rate is the rate that exactly discounts estimated future cash payments (including all fees and points paid or received that form an integral part of the effective interest rate, transaction costs and other premiums or discounts) through the expected life of the financial liability, or (where appropriate) a shorter period, to the net carrying amount on initial recognition.

Trade and other payables are recognised at the transaction cost, which is its fair value, and subsequently measured at amortised cost.

Financial liabilities at FVTPL

A financial liability may be designated as at FVTPL upon initial recognition if:

- such designation eliminates or significantly reduces a measurement or recognition inconsistency that would otherwise arise;
- the financial liability whose performance is evaluated on a fair value basis, in accordance with the Company's documented risk management;

Fair value changes related to such financial liabilities including derivative contracts like forward currency contracts, cross currency swaps, options, interest rate futures and interest rate swaps to hedge its foreign currency risks and interest rate risks, are recognised in the statement of profit and loss.

Derecognition of Financial Liabilities

The Company derecognises financial liabilities when, and only when, the Company's obligations are discharged, cancelled or have expired. An exchange between with a lender of debt instruments with substantially different terms is accounted for as an extinguishment of the original financial liability and the recognition of a new financial liability. Similarly, a substantial modification of the terms of an existing financial liability is accounted for as an extinguishment of the original financial liability and the recognition of a new financial liability. The difference between the carrying amount of the financial liability derecognised and the consideration paid and payable is recognised in profit or loss.

f Operating Cycle

Based on the nature of products / activities of the Company and the normal time between acquisition of assets and their realisation in cash or cash equivalents, the Company has determined its operating cycle as 12 months for the purpose of classification of its assets and liabilities as current and non - current.

g Fair value measurement

Fair value is the price that would be received to sell an asset or paid to transfer a liability in an orderly transaction between market participants at the measurement date. The fair value measurement is based on the presumption that the transaction to sell the financial asset or settle the financial liability takes place either:

- In the principal market, or
- In the absence of a principal market, in the most advantageous market

The principal or the most advantageous market must be accessible by the Company.

A fair value measurement of a non-financial asset takes into account a market participant's ability to generate economic benefits by using the asset in its highest and best use.

The Company- uses valuation techniques that are appropriate in the circumstances and for which sufficient data are available to measure fair value, maximising the use of relevant observable inputs and minimising the use of unobservable inputs.

All assets and liabilities for which fair value is measured or disclosed in the financial statements are categorised within the fair value hierarchy, described as follows, based on the lowest level input that is significant to the fair value measurement as a whole:

- Level 1 — Quoted (unadjusted) market prices in active markets for identical assets or liabilities
- Level 2 — Valuation techniques for which the lowest level input that is significant to the fair value measurement is directly or indirectly observable
- Level 3 — Valuation techniques for which the lowest level input that is significant to the fair value measurement is unobservable

At each reporting date, the Management analyses the movements in the values of assets and liabilities which are required to be remeasured or re-assessed as per the Company's - accounting policies.

For the purpose of fair value disclosures, the Company has determined classes of assets and liabilities on the basis of the nature, characteristics and risks of the asset or liability and the level of the fair value hierarchy as explained above.

h Revenue recognition

Effective 1st April, 2018, the Company adopted Ind AS 115 "Revenue from Contracts with Customers" using the cumulative catch-up transition method, applied to contracts that were not completed as of 1st April, 2018. Revenue is recognized based on the nature of activity, transfer of control & consideration can be reasonably measured and there exists reasonable certainty of its recoverability.

Revenue from construction contracts is recognized by applying percentage of completion method after providing for foreseeable losses, if any. Percentage of completion method is determined as a proportion of the cost incurred up to the reporting date to the total estimated cost to complete. Foreseeable losses, if any on the contracts is recognized an expense in the period in which it is foreseen, irrespective of the stage of completion of the contract. While determining the amount of foreseeable loss, all elements of cost and related incidental income not included in contract revenue is taken into consideration. Contract is reflected at cost that are expected to be recoverable till such time the outcome of the contract cannot be ascertained reliably and at releasable value thereafter.

Contract revenue corresponds to the fair value of consideration received/ receivable from the customer to the extent that it is probable that the result in revenue, and they are capable of being reliably measured.

i Other Income

Interest income from a financial asset is recognised when it is probable that the economic benefits will flow to the Company and the amount of income can be measured reliably. Interest income is accrued on a time basis, by reference to the principal outstanding and at the effective interest rate applicable, which is the rate that exactly discounts estimated future cash receipts through the expected life of the financial asset to that asset's net carrying amount on initial recognition.

j Borrowing costs

Borrowing costs directly attributable to the acquisition, construction or production of qualifying assets, which are assets that necessarily take a substantial period of time to get ready for their intended use or sale, are added to the cost of those assets, until such time as the assets are substantially ready for their intended use or sale. Interest income earned on the temporary investment of specific borrowings pending their expenditure on qualifying assets is deducted from the borrowing costs eligible for capitalisation.

All other borrowing costs are recognised in profit or loss in the period in which they are incurred.

k Employee benefits

i) Defined benefit plans:

The employees' gratuity scheme is a defined benefit scheme. The present value of the obligation under such defined benefit plan is determined at each Balance Sheet date based on actuarial valuation which is carried out by an independent actuary using the Projected Unit Credit method considering discount rate based on the prevailing market yields of Indian government bonds at the valuation date for the expected term of the obligation. Actuarial gains and losses are charged to the Capital work in progress till the commencement of commercial production otherwise, the same is charged to the statement of Profit and Loss for the period.

Defined benefit costs in the nature of current and past service cost and net interest expense or income are recognized in the statement of profit and loss in the period in which they occur. Actuarial gains and losses on re-measurement is reflected immediately in the balance sheet with a charge or credit recognised in other comprehensive income in the period in which they occur and is reflected immediately in retained earnings and not reclassified to profit or loss. Past service cost is recognised in profit or loss in the period of a plan amendment.

ii) Defined contribution plan:

Retirement Benefits in the form of Provident Fund and Family Pension Fund which are defined contribution schemes are charged to the Capital work in progress till the commencement of commercial production otherwise the same is charged to the Statement of Profit and Loss for the period in which the contributions to the respective funds accrue.

iii) Compensated Absences:

Provision for Compensated Absences and its classifications between current and non-current liabilities are based on independent actuarial valuation. The actuarial valuation is done as per the projected unit credit method.

iv) Short term employee benefits:

They are recognised at an undiscounted amount in Capital work in progress till the commencement of commercial production otherwise same is charged to Statement of Profit and Loss for the year in which the related services are received.

l Leases

Leases are classified as operating leases whenever the terms of the lease do not transfer substantially all the risks and rewards of ownership to the lessee.

Rental income from operating leases is generally recognised on a straight-line basis over the term of the relevant lease. Where the rentals are structured solely to increase in line with expected general inflation to compensate for the Company's expected inflationary cost increases, such increases are recognised in the year in which such benefits accrue.

Rental expense from operating leases is generally recognised on a straight-line basis over the term of the relevant lease. Where the rentals are structured solely to increase in line with expected general inflation to compensate for the lessor's expected inflationary cost increases, such increases are recognised in the year in which such benefits accrue.

m Taxation

Tax on Income comprises current and deferred tax. It is recognised in statement of profit and loss except to the extent that it relates to a business combination, or items recognised directly in equity or in other comprehensive income.

Current tax

Tax on income for the current period is determined on the basis on estimated taxable income and tax credits computed in accordance with the provisions of the relevant tax laws and based on the expected outcome of assessments / appeals. Current income tax assets and liabilities are measured at the amount expected to be recovered from or paid to the taxation authorities. The tax rates and tax laws used to compute the amount are those that are enacted or substantively enacted, at the reporting date. Management periodically evaluates positions taken in the tax returns with respect to situations in which applicable tax regulations are subject to interpretation and establishes provisions where appropriate.

Deferred tax

Deferred tax is recognized for the future tax consequences of deductible temporary differences between the carrying values of assets and liabilities and their respective tax bases at the reporting date, using the tax rates and laws that are enacted or substantively enacted as on reporting date. Deferred tax liability are generally recorded for all temporary timing differences. Deferred tax assets are recognized to the extent that it is probable that future taxable income will be available against which the deductible temporary differences can be utilised. Deferred tax relating to items recognized outside the statement of profit and loss is recognized outside the statement of profit and loss, either in other comprehensive income or directly in equity. The carrying amount of deferred tax assets is reviewed at each reporting date.

Deferred tax liabilities and assets are measured at the tax rates that are expected to apply in the period in which the liability is settled or the asset realised, based on tax rates (and tax laws) that have been enacted or substantively enacted by the end of the reporting period.

n Earning per Share

Basic earnings per share is computed by dividing the profit / (loss) after tax by the weighted average number of equity shares outstanding during the year. Diluted earnings per share is computed by dividing the profit / (loss) after tax as adjusted for the effects of dividend, interest and other charges relating to the dilutive potential equity shares by weighted average number of shares plus dilutive potential equity shares.

o Provisions, Contingent Liabilities and Contingent Assets

Provisions are recognised when the Company has a present obligation (legal or constructive) as a result of a past event, it is probable that an outflow of resources embodying economic benefits will be required to settle the obligation and a reliable estimate can be made of the amount of the obligation. The amount recognised as a provision is the best estimate of the consideration required to settle the present obligation at the end of the reporting period, taking into account the risks and uncertainties surrounding the obligation. When a provision is measured using the cash flows estimated to settle the present obligation, its carrying amount is the present value of those cash flows (when the effect of the time value of money is material). When the Company expects some or all of a provision to be reimbursed, for example, under an insurance contract, the reimbursement is recognised as a separate asset, but only when the reimbursement is virtually certain. The expense relating to a provision is presented in the statement of profit and loss net of any reimbursement.

If the effect of the time value of money is material, provisions are discounted using a current pre-tax rate that reflects, when appropriate, the risks specific to the liability. When discounting is used, the increase in the provision due to the passage of time is recognised as a finance cost.

Contingent liabilities may arise from litigation, taxation and other claims against the Company. Where it is management's assessment that the outcome is uncertain or cannot be reliably quantified, the claims are disclosed as contingent liabilities unless the likelihood of an adverse outcome is remote such contingent liabilities are disclosed in the notes but are not provided for in the financial statements. Although there can be no assurance regarding the final outcome of the legal proceedings, the Company does not expect them to have a materially adverse impact on the Company's financial position.

Contingent liabilities are not recognised but are disclosed in the notes. Contingent assets are not recognised but are disclosed in the notes where an inflow of economic benefits is probable.

p Related party Transactions

Disclosure of transactions with Related Parties, as required by Ind AS 24 "Related Party Disclosures" has been set out in a separate note. Related parties as defined under clause 9 of the Ind AS 24 have been identified on the basis of representations made by the management and information available with the Company.

q Cash Flow Statement

Cash flows are reported using indirect method, whereby profit/ (loss) before extraordinary items and tax is adjusted for the effects of transactions of non-cash nature and any deferrals of past or future cash receipts or payments. The cash flows from operating, investing and financing activities of the company are segregated based on the available information.

3 Significant accounting judgements, estimates and assumptions

The preparation of the Company's financial statements requires management to make judgements, estimates and assumptions that affect the reported amounts of revenues, expenses, assets and liabilities, and the accompanying disclosures, and the disclosure of contingent liabilities. Uncertainty about these assumptions and estimates could result in outcomes that require a material adjustment to the carrying amount of assets or liabilities affected in future periods.

The key assumptions concerning the future and other key sources of estimation uncertainty at the reporting date, that have a significant risk of causing a material adjustment to the carrying amounts of assets and liabilities within the next financial year, are described below. Existing circumstances and assumptions about future developments may change due to market changes or circumstances arising that are beyond the control of the Company. Such changes are reflected in the assumptions when they occur.

i) Fair value measurement of financial instruments

When the fair value of financial assets and financial liabilities recorded in the balance sheet cannot be measured based on quoted prices in active markets, their fair value is measured using ECL model. The inputs to these models are taken from observable markets where possible, but where this is not feasible, a degree of judgement is required in establishing fair values. Judgements include considerations of inputs such as liquidity risk, credit risk and volatility. Changes in assumptions about these factors could affect the reported fair value of financial instruments.

ii) Defined benefit plans (gratuity benefits)

The cost of the defined benefit gratuity plan and the present value of the gratuity obligation are determined using actuarial valuations. An actuarial valuation involves making various assumptions that may differ from actual developments in the future. These include the determination of the discount rate, future salary increases and mortality rates. Due to the complexities involved in the valuation and its long-term nature, a defined benefit obligation is highly sensitive to changes in these assumptions. All assumptions are reviewed at each reporting date.

iii) Recognition and measurement of other provisions:

The recognition and measurement of other provisions are based on the assessment of the probability of an outflow of resources, and on past experience and circumstances known at the balance sheet date. The actual outflow of resources at a future date may therefore vary from the figure included in other provisions.

24 Financial Risk objective and policies:

The Company's principal financial liabilities comprise borrowings, provisions, trade and other payables. The main purpose of these financial liabilities is to finance the Company's operations / projects. The Company's principal financial assets include mainly cash and cash equivalents, SCA receivables and other financial assets.

In the ordinary course of business, the Company is exposed to Market risk, Interest risk, Credit risk and Liquidity risk.

(i) Market Risk :

Market risk is the risk that the fair value of future cash flows of a financial instrument will fluctuate because of changes in market prices. Market risk comprises of interest rate risk.

Interest Risk :

The Company has fixed interest rate financial assets and financial liabilities, hence it doesn't have any interest rate risk.

(ii) Credit Risk :

Credit risk is the risk that counterparty will not meet its obligations under a financial instrument or customer contract, leading to a financial loss.

(iii) Liquidity Risk :

The Company monitors its risk of shortage of funds using cash flow forecasting models. These models consider the maturity of its financial investments, committed funding and projected cash flows from operations. The Company's objective is to provide financial resources to meet its business objectives in a timely, cost effective and reliable manner and to manage its capital structure. A balance between continuity of funding and flexibility is maintained through continued support from parent company.

Maturity profile of financial liabilities:

The table below provides details regarding contractual maturities of financial liabilities at the reporting date based on contractual undiscounted payments

As at 31st March, 2021	Less than 1 year	1 to 5 year	More than 5 Years	Total
Borrowings	23,53,03,422	-	-	23,53,03,422
Trade Payables	34,58,418	-	-	34,58,418
Other Financial Liabilities	51,228	-	-	51,228

25 Capital Management

The Company's objectives for managing capital is to safeguard continuity and healthy capital ratios in order to support its business and provide adequate return to shareholders through continuing growth.

The Company sets the amount of capital required on the basis of annual business and long-term operating plans which include capital and other strategic investments.

The funding requirements are met through support from parent company. The Company's policy is to use short-term and long-term borrowings to meet anticipated funding requirements.

- 26** In the opinion of the management and to the best of their knowledge and belief, the value under the head of Current and Non-Current Assets are approximately of the value stated, if realised in ordinary course of business, except unless stated otherwise. The provision for all the known liabilities is adequate and not in excess of amount considered reasonably necessary.

27 Contingent Liabilities & Commitments

Note :

All financial Assets and financial Liabilities valued at amortised cost. Therefore, fair value hierarchy and fair value measurement not disclosed as at 31st March, 2021.

31 Disclosure pursuant to Appendix E of Ind AS 115 Service Concession Arrangements

(i) Description and classification of the arrangements.

The Company has entered into Concession Agreement with the NHAI dated 9th July, 2020 for the purpose of construction of road, development, maintenance and management of the project "Six laning of Vijayawada Bypass from Gollapudi (Design Ch. 30+000) to Chinnakani (design Ch. 47+881) including major bridge across river Krishna in Vijayawada Gundugolanu section of NH-16 under Bharatmala Pariyojana on Hybrid Annuity Mode, NHAI grants to the company exclusive right, license and authority to construct, operate and maintain the project during the construction period of 730 days and operation period of 15 years commencing from COD.

(ii) Significant terms of the Arrangement

(a) Bid Project cost:

The cost of the construction of the project is finalized as ₹ 1,546.31 Crores as at the bid date. Bid project cost is inclusive of the cost of construction, interest during construction, working capital, physical contingency and all other costs, expenses and charges for and in respect of the construction of the project.

(b) Payment of Bid project cost:

40% of the Bid project cost, adjusted for the price index multiple, shall be due and payable to the company in 5 equal installment of 8% each during the construction period in accordance with the provisions of clause 23.4 of the Concession Agreement.

The remaining bid project cost, adjusted for the price index multiple, shall be due and payable in 30 biannual instalments commencing from the 180th day of COD in accordance with the provision of the clause 23.6 of Concession Agreement.

Interest shall be due and payable on the reducing balance of completion cost at an interest rate equal to the applicable bank rate plus 3%. Such interest shall be due and payable biannually along with each installment specified in clause 23.6.4 of Concession Agreement.

(c) Bonus on early completion

The Concession Agreement also provides for the payment of Bonus to the company in the event of COD is achieved on or more than 30 days prior to the Scheduled completion date. The schedule completion date of the project is 730 days from the appointed date.

(d) Operation and Maintenance Payments:

All operation and maintenance payments shall be borne by the concessionaire. However, as provided in the Concession Agreement the company shall be entitled to receive lump sum financial support in the form of biannual payments by the NHAI, which shall be computed on the amount quoted in the O&M bid. Each installment of O&M payment shall be the product of the amount determined in accordance with the terms of the Concession Agreement and the price index multiple on the reference index date preceding the due date of the payment thereof.

(e) Termination of the Concession Agreement:

Concession Agreement can be terminated on account of default of the company or NHAI in the circumstances as specified under article 21.4 of the Concession Agreement.

(f) Restriction on assignment and charges:

In terms of the Concession Agreement the company shall not assign, transfer, or dispose of all or any rights and the benefits under Concession Agreement or create any encumbrances thereto except as permitted under concession agreement without prior consent of NHAI.

(g) Changes in Concession Agreement:

There have been no changes in the concession arrangement during the period.

(h) Financial Assets relating to Concession Agreement:

SCA Receivables of ₹ Nil for FY 2020-21.

32 As per Ind AS - 19 "Employee Benefits", the disclosure are given below :

(a) Defined Benefit Plan

The Company operates a defined benefit plan (the Gratuity plan) covering eligible employees, which provides a lump sum payment to vested employees at retirement, death, incapacitation or termination of employment, of an amount based on the respective employee's salary and the tenure of employment.

The status of gratuity plan (non-funded) as required under Ind AS-19 :

		(Amount in ₹)

V. Actuarial Assumptions		As at
		31st March, 2021
Discount Rate (per annum)		6.70%
Expected annual Increase in Salary Cost		8.50%
Attrition Rate		9.09%
Mortality Rates are given under Indian Assured Lives Mortality (2012-14) Ultimate Retirement Age 58 Years.		

VI. Sensitivity Analysis

Significant actuarial assumptions for the determination of the defined benefit obligation are discount rate, expected salary increase and mortality. The sensitivity analysis below have been determined based on reasonably possible changes of the assumptions occurring at the end of the reporting period, while holding all other assumptions constant. The results of sensitivity analysis is given below:

Particulars	As at 31st March, 2021
Defined Benefit Obligation (Base)	17,685

Particulars	As at 31st March, 2021	
	Decrease	Increase
Discount Rate (- / + 1%)	19,950	15,750
(% change compared to base due to sensitivity)	12.8%	-10.9%
Salary Growth Rate (- / + 1%)	15,763	19,888
(% change compared to base due to sensitivity)	-10.9%	12.5%
Attrition Rate (- / + 50%)	21,588	14,633
(% change compared to base due to sensitivity)	22.1%	-17.3%
Mortality Rate (- / + 10%)	17,689	17,681
(% change compared to base due to sensitivity)	0.0%	0.0%

VII. Asset Liability Matching Strategies

The scheme is managed on unfunded basis.

a) Funding arrangements and Funding Policy

The scheme is managed on unfunded basis.

b) Expected Contribution during the next annual reporting period

The Company's best estimate of Contribution during the next year is NIL.

c) Maturity Profile of Defined Benefit Obligation

Weighted average duration (based on discounted cashflows) - 12 years

Expected cash flows over the next (valued on undiscounted basis):	(Amount in ₹)
1 year	28
2 to 5 years	3,722
6 to 10 years	8,721
More than 10 years	31,212

VIII. The discount rate is based on the prevailing market yields of Government of India securities as at the balance sheet date for the estimated term of the obligations.

(b) Other Long Term Employee Benefits

The actuarial liability for compensated absences as at the period ended 31st March, 2021 is ₹ 1,42,022.

(c) Defined Contribution Plan

Contribution to Defined Contribution Plans, recognised in Statement of profit and loss Expenditure, for the period 15th May, 2020 to 31st March, 2021 is as under :

	For the Period from 15th May, 2020 to 31st March, 2021 (Amount in ₹)
Employer's Contribution to Provident Fund	
Employer's Contribution to Superannuation Fund	1,96,967

33 Related party transactions

(Amount in ₹)		
Related Party Name	Nature of Closing Balance	As at 31st March, 2021
Adani Road Transport Limited	Borrowings	23,53,03,422

34 Events occurring after the Balance sheet Date

The Company evaluates events and transactions that occur subsequent to the balance sheet date but prior to the financial statements to determine the necessity for recognition and/or reporting of any of these events and transactions in the financial statements. As of 3rd May, 2021 there were no subsequent events to be recognized or reported that are not already disclosed.

35 Due to outbreak of COVID 19 globally and in India, The Company's management has made initial assessment of likely adverse impact on business and financial risks on account of COVID 19, and believes that the impact is likely to be short term in nature. The management does not see any medium to long term risks in the Company's ability to continue as a going concern and meeting its liabilities as and when they fall due, and compliance with the debt covenants, as applicable.

36 This, being the first financial statements of the Company since Incorporation, are drawn for the period from 15th May, 2020 to 31st March, 2021 and hence, there are no comparatives to present.
