**Foreign exchange gains and losses**

The fair value of financial assets denominated in a foreign currency is determined in that foreign currency and translated at the spot rate at the end of each reporting period.

For foreign currency denominated financial assets measured at amortised cost and FVTPL, the exchange differences are recognised in profit or loss.

**f Financial liabilities and equity instruments**

**Classification as debt or equity**

Debt and equity instruments issued by the Company are classified as either financial liabilities or as equity in accordance with the substance of the contractual arrangements and the definitions of a financial liability and an equity instrument.

**Equity instruments**

An equity instrument is any contract that evidences a residual interest in the assets of an entity after deducting all of its liabilities. Equity instruments issued by the Company are recognised at the proceeds received, net of direct issue costs.

**Financial liabilities**

All financial liabilities are subsequently measured at amortised cost using the effective interest method or at FVTPL.

**Financial liabilities at FVTPL**

A financial liability may be designated as at FVTPL upon initial recognition if

- such designation eliminates or significantly reduces a measurement or recognition inconsistency that would otherwise arise
- the financial liability whose performance is evaluated on a fair value basis, in accordance with the Company's documented risk management.

Financial liabilities at FVTPL are stated at fair value, with any gains or losses arising on remeasurement recognised in profit or loss. The net gain or loss recognised in profit or loss incorporates any interest paid on the financial liability.

Fair values are determined in the manner described in note 'k'.

**Financial liabilities at amortised cost**

Financial liabilities that are not held-for-trading and are not designated as at FVTPL are measured at amortised cost at the end of subsequent accounting periods. The carrying amounts of financial liabilities that are subsequently measured at amortised cost are determined based on the effective interest method. Interest expense that is not capitalised as part of costs of an asset is included in the 'Finance costs' line item.

The effective interest method is a method of calculating the amortised cost of a financial liability and of allocating interest expense over the relevant period. The effective interest rate is the rate that exactly discounts estimated future cash payments (including all fees and points paid or received that form an integral part of the effective interest rate, transaction costs and other premiums or discounts) through the expected life of the financial liability or (where appropriate) a shorter period, to the net carrying amount on initial recognition.

Trade and other payables are recognised at the transaction cost, which is its fair value, and subsequently measured at amortised cost.

**Foreign exchange gains and losses**

For financial liabilities that are denominated in a foreign currency and are measured at amortised cost at the end of each reporting period, the foreign exchange gains and losses are determined based on the amortised cost of the instruments and are recognised in 'Other income'.

The fair value of financial liabilities denominated in a foreign currency is determined in that foreign currency and translated at the spot rate at the end of the reporting period. For financial liabilities that are measured as at FVTPL, the foreign exchange component forms part of the fair value gains or losses and is recognised in profit or loss.

**Derecognition of financial liabilities**

The Company derecognises financial liabilities when, and only when, the Company's obligations are discharged, cancelled or have expired. An exchange between with a lender of debt instruments with substantially different terms is accounted for as an extinguishment of the original financial liability and the recognition of a new financial liability. Similarly, a substantial modification of the terms of an existing financial liability is accounted for as an extinguishment of the original financial liability and the recognition of a new financial liability. The difference between the carrying amount of the financial liability derecognised and the consideration paid and payable is recognised in profit or loss. The Company derecognises financial liabilities when, and only when, the Company's obligations are discharged, cancelled or have expired. An exchange between with a lender of debt instruments with substantially different terms is accounted for as an extinguishment of the original financial liability and the recognition of a new financial liability. Similarly, a substantial modification of the terms of an existing financial liability is accounted for as an extinguishment of the original financial liability and the recognition of a new financial liability. The difference between the carrying amount of the financial liability derecognised and the consideration paid and payable is recognised in profit or loss.

**g Derivative financial instruments**

The Company enters into a variety of derivative financial instruments to manage its exposure to foreign exchange rate risks such as forward currency contracts. Further details of derivatives financial instruments are disclosed in note 40.

Derivatives are initially recognised at fair value at the date the derivative contracts are entered into and are subsequently remeasured to their fair value at the end of each reporting period. The resulting gain or loss is recognised in profit or loss immediately.

**Embedded derivatives**

Derivatives embedded in non-derivative host contracts that are not financial assets within the scope of Ind AS 109 are treated as separate derivatives when their risks and characteristics are not closely related to those of the host contracts and the host contracts are not measured at FVTPL.

**h Inventories**

Inventories are stated at the lower of weighted average cost or net realisable value. Costs include all non-refundable duties and all charges incurred in bringing the goods to their present location and condition. Net realisable value represents the estimated selling price for inventories less all estimated costs of completion and costs necessary to make the sale.

**i Current versus non-current classification**

The Company presents assets and liabilities in the balance sheet based on current/ non-current classification. An asset is treated as current when it is

- expected to be realised or intended to be sold or consumed in normal operating cycle
- Held primarily for the purpose of trading
- Expected to be realised within twelve months after the reporting period, or
- Cash or cash equivalent unless restricted from being exchanged or used to settle a liability for at least twelve months after the reporting period.

The Company classifies all other assets as non-current.

A liability is current when

- It is expected to be settled in normal operating cycle
- It is held primarily for the purpose of trading
- It is due to be settled within twelve months after the reporting period, or
- There is no unconditional right to defer the settlement of the liability for at least twelve months after the reporting period.

The Company classifies all other liabilities as non-current.

The operating cycle is the time between the acquisition of assets for processing and their realisation in cash and cash equivalents. The Company has identified twelve months as its operating cycle.

**j Foreign currencies**

The Company's financial statements are presented in INR which is company's functional currency and items included in the financial statements are measured using this functional currency.

**Transactions and balances**

Transactions in foreign currencies are initially recorded by the Company at its functional currency spot rates at the date the transaction first qualifies for recognition.

Monetary assets and liabilities denominated in foreign currencies are translated at the functional currency spot rates of exchange at the reporting date.

Non-monetary items that are measured in terms of historical cost in a foreign currency are translated using the exchange rates at the dates of the initial transactions.

**k Fair value measurement**

Fair value is the price that would be received to sell an asset or paid to transfer a liability in an orderly transaction between market participants at the measurement date. The fair value measurement is based on the presumption that the transaction to sell the financial asset or settle the financial liability takes place either:

- In the principal market, or
- In the absence of a principal market, in the most advantageous market

The principal or the most advantageous market must be accessible by the Company.

A fair value measurement of a non-financial asset takes into account a market participant's ability to generate economic benefits by using the asset in its highest and best use.

The Company uses valuation techniques that are appropriate in the circumstances and for which sufficient data are available to measure fair value, maximising the use of relevant observable inputs and minimising the use of unobservable inputs.

All assets and liabilities for which fair value is measured or disclosed in the financial statements are categorised within the fair value hierarchy described as follows, based on the lowest level input that is significant to the fair value measurement as a whole:

- Level 1 — Quoted (unadjusted) market prices in active markets for identical assets or liabilities
- Level 2 — Valuation techniques for which the lowest level input that is significant to the fair value measurement is directly or indirectly observable
- Level 3 — Valuation techniques for which the lowest level input that is significant to the fair value measurement is unobservable

At each reporting date, the Management analyses the movements in the values of assets and liabilities which are required to be remeasured or re-assessed as per the Company's accounting policies.

For the purpose of fair value disclosures, the Company has determined classes of assets and liabilities on the basis of the nature, characteristics and risks of the asset or liability and the level of the fair value hierarchy as explained above.

**l Government grants**

The Company recognises government grants only when there is reasonable assurance that the conditions attached to them will be complied with and the grants will be received. Where Government grants relates to assets, the cost of assets are presented at gross value and grant thereon is recognised as income in the statement of profit and loss over the useful life of the related assets in proportion in which depreciation is charged.

Grants related to income are recognised in the statement of profit and loss in the same period as the related cost which they are intended to compensate are accounted for.

**m Revenue Recognition:**

Revenue from contracts with customers is recognised when control of the goods or services are transferred to the customer at an amount that reflects the consideration to which the Company expects to be entitled in exchange for those goods or services.

Revenue is measured based on the transaction price, which is the consideration, adjusted for discounts and other incentives, if any, as specified in the contract with the customer. Revenue also excludes taxes or other amounts collected from customers.

**i) Sale of goods**

The Company's contracts with customers for the sale of goods generally include one performance obligation. Revenue from the sale of other goods is recognised at the point in time when control of the asset is transferred to the customers, generally on delivery of the goods.

ii) Interest income is recognised on time proportion basis at the effective interest rate ("EIR") applicable.

iii) Profit or loss on sale of investment is recognised on the contract date.

**n Borrowing costs**

Borrowing costs directly attributable to the acquisition, construction or production of qualifying assets, which are assets that necessarily take a substantial period of time to get ready for their intended use or sale, are added to the cost of those assets, until such time as the assets are substantially ready for their intended use or sale. Interest income earned on the temporary investment of specific borrowings pending their expenditure on qualifying assets is deducted from the borrowing costs eligible for capitalisation.

All other borrowing costs are recognised in profit or loss in the period in which they are incurred.

**o Employee benefits**

**i) Defined benefit plans:**

The employees' gratuity scheme is a defined benefit scheme. The present value of the obligation under such defined benefit plan is determined at each Balance Sheet date based on actuarial valuation which is carried out by an independent actuary using the Projected Unit Credit method considering discount rate based on the prevailing market yields of Indian government bonds at the valuation date for the expected term of the obligation. Actuarial gains and losses are charged to the Capital work in progress till the commencement of commercial production otherwise, the same is charged to the statement of Profit and Loss for the period.

Defined benefit costs in the nature of current and past service cost and net interest expense or income are recognized in the statement of profit and loss in the period in which they occur. Actuarial gains and losses on re-measurement is reflected immediately in the balance sheet with a charge or credit recognised in other comprehensive income in the period in which they occur and is reflected immediately in retained earnings and not re-assigned to profit or loss. Past service cost is recognised in profit or loss in the period of a plan amendment.

**ii) Defined contribution plan:**

Retirement Benefits in the form of Provident Fund and Family Pension Fund which are defined contribution schemes are charged to the Capital work in progress till the commencement of commercial production otherwise the same is charged to the Statement of Profit and Loss for the period in which the contributions to the respective funds accrue.

**iii) Compensated Absences:**

Provision for Compensated Absences and its classifications between current and non-current liabilities are based on independent actuarial valuation. The actuarial valuation is done as per the projected unit credit method.

**iv) Short term employee benefits:**

They are recognised at an undiscounted amount in Capital work in progress till the commencement of commercial production otherwise same is charged to Statement of Profit and Loss for the year in which the related services are received.

**p Leases****Under Ind AS 116 Leases:**

Effective 1st April, 2019 (i.e. Previous Year), the Company has adopted Ind AS 116 – Leases and applied the standard to all lease contracts existing on 1st April, 2019 using the modified retrospective method.

At inception of a contract, the Company assesses whether a contract is, or contains, a lease. A contract is or contains, a lease if the contract conveys the right to control the use of an identified asset for a period of time in exchange for consideration.

The Company recognises a right-of-use asset and a lease liability at the lease commencement date except for leases with a term of twelve months or less (short-term leases) and low value leases. For these short-term and low value leases, the lease payments associated with these leases as an expense on a straight-line basis over the lease term.

Lease term is a non-cancellable period together with periods covered by an option to extend the lease if the Company is reasonably certain to exercise that option; and periods covered by an option to terminate the lease if the Company is reasonably certain not to exercise that option.

The right-of-use asset is initially measured at cost, which comprises the initial amount of the lease liability adjusted for any lease payments made at or before the commencement date, plus any initial direct costs incurred and an estimate of costs to dismantle and remove the underlying asset or to restore the underlying asset or the site on which it is located, less any lease incentives received. The right-of-use asset is subsequently depreciated using the straight-line method from the commencement date to the end of the lease term. In addition, the right-of-use asset is periodically reduced by impairment losses, if any, and adjusted for certain remeasurements of the lease liability.

The lease liability is initially measured at the present value of the lease payments to be paid over the lease term at the commencement date, discounted using the interest rate implicit in the lease or, if that rate cannot be readily determined, the Company's incremental borrowing rate. Generally, the Company uses its incremental borrowing rate as the discount rate. Subsequently, the lease liability is measured at amortised cost using the effective interest method.

**q Taxes on Income**

Tax on Income comprises current and deferred tax. It is recognised in statement of profit and loss except to the extent that it relates to a business combination, or items recognised directly in equity or in other comprehensive income.

**Current tax**

Tax on income for the current period is determined on the basis on estimated taxable income and tax credits computed in accordance with the provisions of the relevant tax laws and based on the expected outcome of assessments / appeals. Current income tax assets and liabilities are measured at the amount expected to be recovered from or paid to the taxation authorities. The tax rates and tax laws used to compute the amount are those that are enacted or substantively enacted, at the reporting date. Management periodically evaluates positions taken in the tax returns with respect to situations in which applicable tax regulations are subject to interpretation and establishes provisions where appropriate.

**Deferred tax**

Deferred tax is recognized for the future tax consequences of deductible temporary differences between the carrying values of assets and liabilities and their respective tax bases at the reporting date, using the tax rates and laws that are enacted or substantively enacted as on reporting date. Deferred tax liability are generally recorded for all temporary timing differences. Deferred tax assets are recognized to the extent that it is probable that future taxable income will be available against which the deductible temporary differences can be utilised. Deferred tax relating to items recognized outside the statement of profit and loss is recognized outside the statement of profit and loss, either in other comprehensive income or directly in equity. The carrying amount of deferred tax assets is reviewed at each reporting date.

Deferred tax liabilities and assets are measured at the tax rates that are expected to apply in the period in which the liability is settled or the asset realised, based on tax rates (and tax laws) that have been enacted or substantively enacted by the end of the reporting period.

**r Earnings per share**

Basic earnings per share is computed by dividing the profit / loss after tax by the weighted average number of equity shares outstanding during the period. Diluted earnings per share is computed by dividing the profit / (loss) after tax as adjusted for the effects of dividend, interest and other charges relating to the dilutive potential equity shares by weighted average number of equity shares plus dilutive potential equity shares.

**s Provisions, Contingent Liabilities and Contingent Assets**

Provisions are recognised when the Company has a present obligation (legal or constructive) as a result of a past event, it is probable that an outflow of resources embodying economic benefits will be required to settle the obligation and a reliable estimate can be made of the amount of the obligation. The amount recognized as a provision is the best estimate of the consideration required to settle the present obligation at the end of the reporting period, taking into account the risks and uncertainties surrounding the obligation. If the effect of the time value of money is material, provisions are discounted using a current pre-tax rate that reflects, when appropriate, the risks specific to the liability. When discounting is used, the increase in the provision due to the passage of time is recognised as a finance cost.

When the Company expects some or all of a provision to be reimbursed, for example, under an insurance contract, the reimbursement is recognised as a separate asset, but only when the reimbursement is virtually certain. The expense relating to a provision is presented in the statement of profit and loss net of any reimbursement.

Contingent liabilities are not recognised but are disclosed in the notes.

Contingent assets are not recognised but are disclosed in the notes where an inflow of economic benefits is probable.

**t Impairment**

**i) Impairment of tangible and intangible assets**

At the end of each reporting period, the Company reviews the carrying amounts of its tangible and intangible assets to determine whether there is any indication that those assets have suffered an impairment loss. If any such indication exists, the recoverable amount of the asset is estimated in order to determine the extent of the impairment loss (if any). When it is not possible to estimate the recoverable amount of an individual asset, the Company estimates the recoverable amount of the cash-generating unit to which the asset belongs. When a reasonable and consistent basis of allocation can be identified, corporate assets are also allocated to individual cash-generating units, or otherwise they are allocated to the smallest group of cash-generating units for which a reasonable and consistent allocation basis can be identified.

Recoverable amount is the higher of fair value less costs of disposal and value in use. In assessing value in use, the estimated future cash flows are discounted to their present value using a pre-tax discount rate that reflects current market assessments of the time value of money and the risks specific to the asset for which the estimates of future cash flows have not been adjusted.

If the recoverable amount of an asset (or cash-generating unit) is estimated to be less than its carrying amount, the carrying amount of the asset (or cash-generating unit) is reduced to its recoverable amount. An impairment loss is recognised immediately in profit or loss.

When an impairment loss subsequently reverses, the carrying amount of the asset (or a cash-generating unit) is increased to the revised estimate of its recoverable amount, but so that the increased carrying amount does not exceed the carrying amount that would have been determined had no impairment loss been recognised for the asset (or cash-generating unit) in prior years. A reversal of an impairment loss is recognised immediately in profit or loss.

**ii) Financial assets**

A financial asset is assessed at each reporting date to determine whether there is an objective evidence which indicates that it is impaired. A financial asset is considered to be impaired if an objective evidence indicates that one or more events have a negative effect on the estimated future cash flows of that asset.

The Company applies expected credit loss (ECL) model for measurement and recognition of impairment loss on the following financial assets and credit risk exposure.

a) Financial assets that are debt instruments, and are measured at amortised cost ex. loans, debt securities, deposits, trade receivables and bank balances.

b) Trade receivables or any contractual right to receive cash or another financial asset that result from transactions that are within the scope of Ind AS 11 and Ind AS 18.

For recognition of impairment loss on other financial assets and risk exposure, the Company determines that whether there has been a significant increase in the credit risk. If credit risk has not increased significantly, 12 month ECL is used to provide for impairment loss. However, if credit risk has increased significantly, lifetime ECL is used.

ECL is the difference between all contracted cash flows that are due to the Company in accordance with the contract and all the cash flows that the Company expects to receive, discounted at the original EIR. ECL impairment loss allowance (or reversal) recognised during the period is recognised as expense / (income) in the statement of profit and loss.

**3 Significant accounting judgements, estimates and assumptions**

The preparation of the Company's financial statements requires management to make judgements, estimates and assumptions that affect the reported amounts of revenues, expenses, assets and liabilities, and the accompanying disclosures, and the disclosure of contingent liabilities. Uncertainty about these assumptions and estimates could result in outcomes that require a material adjustment to the carrying amount of assets or liabilities affected in future periods.

**Estimates and assumptions**

The key assumptions concerning the future and other key sources of estimation uncertainty at the reporting date, that have a significant risk of causing a material adjustment to the carrying amounts of assets and liabilities within the next financial year, are described below. Existing circumstances and assumptions about future developments may change due to market changes or circumstances arising that are beyond the control of the Company. Such changes are reflected in the assumptions when they occur.

**i) Fair value measurement of financial instruments**

In estimating the fair value of financial assets and financial liabilities, the Company uses market observable data to the extent available. Where such Level 1 inputs are not available, the Company establishes appropriate valuation techniques and inputs to the model. The inputs to these models are taken from observable markets where possible, but where this is not feasible, a degree of judgement is required in establishing fair values. Judgements include considerations of inputs such as liquidity risk, credit risk and volatility. Changes in assumptions about these factors could affect the reported fair value of financial instruments. Information about the valuation techniques and inputs used in determining the fair value of various assets and liabilities are disclosed in note 42.

**ii) Defined benefit plans (gratuity benefits)**

The cost of the defined benefit gratuity plan and the present value of the gratuity obligation are determined using actuarial valuations. An actuarial valuation involves making various assumptions that may differ from actual developments in the future. These include the determination of the discount rate, future salary increases and mortality rates. Due to the complexities involved in the valuation and its long-term nature, a defined benefit obligation is highly sensitive to changes in these assumptions. All assumptions are reviewed at each reporting date.

**iii) Taxes**

Significant management judgement is required to determine the amount of deferred tax assets that can be recognised, based upon the likely timing and the level of future taxable profits together with future tax planning strategies.

	USD	17.55	2.40	-	-

(Figures below 50,000 are denominated by 0.00\*)

## 41 Financial Risk Management Objective and Policies:

The Company's risk management activities are subject to the management direction and control under the framework of Risk Management Policy as approved by the Board of Directors of the Company. The Management ensures appropriate risk governance framework for the Company through appropriate policies and procedures and that risks are identified, measured and managed in accordance with the Company's policies and risk objectives.

The Company is primarily exposed to risks resulting from fluctuation in market risk, credit risk and liquidity risk, which may adversely impact the fair value of its financial instruments.

## (i) Market Risk

Market risk is the risk of loss of future earnings, fair value or future cash flows of a financial instrument, that may result from adverse changes in interest rate and foreign currency exchange rates.

**A. Foreign Currency Exchange Risk :**

Since the Company operates in more than one currency, it is exposed to currency risks through its transactions in more than one foreign currency or where assets or liabilities are denominated in currency other than functional currency.

The company evaluates exchange rate exposure arising from foreign currency transactions and follows established risk management policies including the use of derivatives like foreign exchange forward and option contracts to hedge exposure to foreign currency risks

For open positions on outstanding foreign currency contracts and details on unhedged foreign currency exposure, please refer note no 40

Every percentage point depreciation / appreciation in the exchange rate between the Indian Rupee and the U. S. Dollar, would have affected the Company's profit for the year as follows:

Particulars	For the year ended 31st March, 2021	For the year ended 31st March, 2020
Impact on profit for the year	3.46	3.80

**B. Interest Risk :**

The Company is exposed to changes in interest rates due to its financing, investing and cash management activities. The risks arising from interest rate movements arise from borrowings with variable interest rates. The Company manages its interest rate risk by having a balanced portfolio of fixed and variable rate loans and borrowings

The Company's risk management activities are subject to the management, direction and control of Central treasury team of the Adani Group under the framework of Risk Management Policy for interest rate risk. The Group's central treasury team ensures appropriate financial risk governance framework for the Company through appropriate policies and procedures and that financial risks are identified, measured and managed in accordance with the Group's policies and risk objectives

For Company's total borrowings, the analysis is prepared assuming the amount of the liability outstanding at the end of the reporting period was outstanding for the whole year. A 50 basis point increase or decrease is used, which represents management's assessment of the reasonably possible change in interest rate

(₹ in Crores)		
Particulars	For the year ended 31st March, 2021	For the year ended 31st March, 2020
Total Borrowings	864.10	938.77

In case of fluctuation in interest rates by 50 basis points and all other variables were held constant, the Company's profit for the year would increase or decrease as follows:

(₹ in Crores)		
Particulars	For the year ended 31st March, 2021	For the year ended 31st March, 2020
Impact on profit for the year	4.32	4.69

The year end balances are not necessarily representative of the average debt outstanding during the year

## (ii) Credit Risk

Credit risk refers to the risk that a counterparty or customer will default on its contractual obligations resulting in a loss to the company. Financial instruments that are subject to credit risk principally consist of Loans, Trade and Other Receivables, Cash & Cash Equivalents, Investments and Other Financial Assets. The carrying amounts of financial assets represent the maximum credit risk exposure

Credit risk encompasses both, the direct risk of default and the risk of deterioration of creditworthiness as well as concentration of risks. Credit risk is controlled by analysing credit limits and creditworthiness of counter parties on continuous basis with appropriate approval mechanism for sanction of credit limits. Credit risk from balances with banks, financial institutions and investments is managed by the company's treasury team in accordance with the company's risk management policy. Cash and cash equivalents and Bank deposits are placed with banks having good reputation, good past track record and high quality credit rating

## (iii) Liquidity Risk

Liquidity risk refers the risk that the Company will encounter difficulty in meeting the obligations associated with its financial liabilities. The Company's objective is to provide financial resources to meet its obligations when they are due in a timely, cost effective and reliable manner without incurring unacceptable losses or risking damage to the Company's reputation. The Company monitors liquidity risk using cash flow forecasting models. These models consider the maturity of its financial investments, committed funding and projected cash flows from operations.

The table below provides details regarding the remaining contractual maturities of financial liabilities at the reporting date based on contractual discounted payments.

(₹ in Crores)					
As at 31st March, 2021	Carrying Value	Less than 1 year	1 to 5 years	More than 5 years	Total
Borrowings (including current maturities of long-term borrowings)	1,667.14	1,031.50	894.26		1,925.76
Trade Payables	477.86	352.86	125.00		477.86
Lease Liabilities	82.31	6.61	35.42	191.86	233.89
Other Financial Liabilities	56.87	22.34	34.53		56.87
<b>Total</b>	<b>2,284.18</b>	<b>1,413.31</b>	<b>1,089.21</b>	<b>191.86</b>	<b>2,694.38</b>

The table has been drawn up based on the undiscounted contractual maturities of the financial liabilities including interest that will be paid on these liabilities upto the maturity of the instruments

## 42 Fair Value Measurement :

a) The carrying value of financial instruments by categories as of 31st March, 2021 is as follows :

Particulars	(₹ in Crores)			
	Fair Value through other Comprehensive income	Fair Value through profit or loss	Amortised cost	Total
<b>Financial Assets</b>				
Cash and cash equivalents	-	-	62.37	62.37
Bank balances other than cash and cash equivalents	-	-	68.86	68.86
Trade Receivables	-	-	813.24	813.24
Loans	-	-	8.11	8.11
Other Financial assets	-	-	102.99	102.99
<b>Total</b>	<b>-</b>	<b>-</b>	<b>1,055.57</b>	<b>1,055.57</b>
<b>Financial Liabilities</b>				
Borrowings	-	-	1,522.27	1,522.27
Trade Payables	-	-	477.86	477.86
Other Financial Liabilities	-	-	284.05	284.05
<b>Total</b>	<b>-</b>	<b>-</b>	<b>2,284.18</b>	<b>2,284.18</b>

b) The carrying value of financial instruments by categories as of 31st March, 2020 is as follows :

Particulars	(₹ in Crores)			
	Fair Value through other Comprehensive income	Fair Value through profit or loss	Amortised cost	Total
<b>Financial Assets</b>				
Cash and cash equivalents	-	-	0.32	0.32
Bank balances other than cash and cash equivalents	-	-	141.91	141.91
Trade Receivables	-	-	509.66	509.66
Loans	-	-	14.94	14.94
Derivative instruments	-	0.21	-	0.21
Other Financial assets	-	-	91.83	91.83
<b>Total</b>	<b>-</b>	<b>0.21</b>	<b>758.66</b>	<b>758.87</b>
<b>Financial Liabilities</b>				
Borrowings	-	-	1,605.12	1,605.12
Trade Payables	-	-	423.06	423.06
Other Financial Liabilities	-	-	281.81	281.81
<b>Total</b>	<b>-</b>	<b>-</b>	<b>2,309.99</b>	<b>2,309.99</b>

(Figures below ₹ 50,000 are denominated by 0.00\*)

The Carrying amount of financial assets and financial liabilities measured at amortised cost in the financial statements are reasonable approximation of their fair value, since the Company does not anticipate that the carrying amount would be significantly different from the values that would eventually be received or settled.

## 43 Fair Value hierarchy :

Particulars	(₹ in Crores)		
	Level 2	Level 3	Total
<b>As at 31st March, 2021</b>			
<b>Assets</b>			
Investments in Mutual Fund	-	-	-
Derivative instruments	-	-	-
<b>Total</b>	<b>-</b>	<b>-</b>	<b>-</b>
<b>Liabilities</b>			
Derivative instruments	-	-	-
<b>Total</b>	<b>-</b>	<b>-</b>	<b>-</b>
<b>As at 31st March, 2020</b>			
<b>Assets</b>			
Derivative instruments	-	0.21	0.21
<b>Total</b>	<b>0.21</b>	<b>-</b>	<b>0.21</b>
<b>Liabilities</b>			
Derivative instruments	-	-	-
<b>Total</b>	<b>-</b>	<b>-</b>	<b>-</b>

The fair values of the financial assets and financial liabilities included in the level 2 and level 3 categories above have been determined in accordance with generally accepted pricing models based on a discounted cash flow analysis, with the most significant inputs being the discount rate that reflects the credit risk of counterparties.

## 44 Pursuant to the Indian Accounting Standard (Ind AS- 33) – "Earnings per Share", the disclosure is as under:

Particulars		For the year ended 31st March, 2021	For the year ended 31st March, 2020
<b>Basic and Diluted EPS</b>			
Profit attributable to equity shareholders	(₹ in Crores)	418.11	314.74
Weighted average number of equity shares outstanding during the year	No	300,000,000	300,000,000
Nominal Value of equity share	₹	10	10
Basic and Diluted EPS	₹	13.94	10.49

Potential equity shares in the form of compulsory convertible debentures, pending conversion are ignored in the calculation of diluted earnings per share as the number of equity shares to be allotted is currently undeterminable.

## Notes to financial statements for the year ended 31st March, 2021

## 45 Capital Management

The Company's objectives when managing capital is to safeguard continuity and healthy capital ratios in order to support its business and provide adequate return to shareholders through continuing growth. The Company's overall strategy remains unchanged from previous year.

The Company sets the amount of capital required on the basis of annual business and long-term operating plans which include capital and other strategic investments.

The funding requirements are met through a mixture of equity, internal fund generation, borrowings. The Company's policy is to use borrowings to meet anticipated funding requirements. The Company monitors capital on the basis of the net debt to equity ratio.

46 The Company's activities during the year revolve around manufacture of Solar Photovoltaic modules / systems and Solar Cell. Considering the nature of Company's business and operations, as well as based on reviews of operating results by the chief operating decision maker to make decisions about resource allocation and performance measurement, there is only one reportable segment in accordance with the requirements of Ind AS - 108 - "Operating Segments", prescribed under Companies (Indian Accounting Standards) Rules, 2015.

47 As per Ind AS - 19 "Employee Benefits", the disclosure are given below :

## (a) Defined Benefit Plan

The Company operates a defined benefit plan (the Gratuity plan) covering eligible employees, which provides a lump sum payment to vested employees at retirement, death, incapacitation or termination of employment, of an amount based on the respective employee's salary and the tenure of employment.

The status of gratuity plan (non-funded) as required under Ind AS - 19 "Employee Benefits"

Experience variance (i.e. Actual experience vs. assumptions)	0.07	0.08
Total Defined benefit cost / (Gain) recognised in Other Comprehensive Income	0.14	0.56
<b>vi. Actuarial Assumptions</b>		
Discount Rate (per annum)	6.70%	6.70%
Annual Increase in Salary Cost	8.00%	8.50%
Attrition Rate	7.58%	12.00%
Mortality Rates are given under Indian Assured Lives Mortality (2012-14) Ultimate Retirement Age 58 Years		

## vii. Sensitivity Analysis

Significant actuarial assumptions for the determination of the defined benefit obligation are discount rate, expected salary increase and mortality. The sensitivity analysis below have been determined based on reasonably possible changes of the assumptions occurring at the end of the reporting period, while holding all other assumptions constant. The results of sensitivity analysis is given below:

Particulars	As at 31st March, 2021	As at 31st March, 2020
Defined Benefit Obligation (Base)	4.90	3.97

Particulars	As at 31st March 2021 (₹ in Crores)		As at 31st March 2020 (₹ in Crores)	
	Decrease	Increase	Decrease	Increase
Discount Rate (- / + 1%)	5.39	4.48	4.29	3.70
(% change compared to base due to sensitivity)	10.00%	-8.60%	7.90%	-7.00%
Salary Growth Rate (- / + 1%)	4.48	5.38	3.70	4.28
(% change compared to base due to sensitivity)	-8.60%	9.80%	-7.00%	7.10%
Attrition Rate (- / + 50%)	5.18	4.70	4.46	3.64
(% change compared to base due to sensitivity)	5.60%	-4.10%	12.00%	-8.40%
Mortality Rate (- / + 10%)	4.90	4.90	3.98	3.98
(% change compared to base due to sensitivity)	0.00%	0.00%	0.00%	0.00%

## Notes to financial statements for the year ended 31st March, 2021

## viii. Effect of Plan on Entity's Future Cash Flows

## a) Funding arrangements and Funding Policy

The scheme is managed on unfunded basis.

## b) Expected Contribution during the next annual reporting period

The Company's best estimate of Contribution during the next year is Nil as scheme is managed on unfunded basis.

## c) Maturity Profile of Defined Benefit Obligation

Weighted average duration (based on discounted cash flows) - 9 years.

Expected cash flows over the next (valued on undiscounted basis):	(₹ in Crores)
1 year	0.32
2 to 5 years	1.56
6 to 10 years	2.42
More than 10 years	6.08

The discount rate is based on the prevailing market yields of Government of India securities as at the balance sheet date for the estimated term of the obligations

The actuarial liability for compensated absences as at the year ended 31st March, 2021 is ₹ 4.89 Crores (31st March, 2020 is ₹ 3.92 Crores)

## (b) Defined Contribution Plan

## Contribution to Defined Contribution Plans

Particulars	For the year ended 31st March, 2021 (₹ in Crores)	For the year ended 31st March, 2020 (₹ in Crores)
Employer's Contribution to Provident Fund	2.94	3.15
Employer's Contribution to Superannuation Fund	0.01	0.01

(Figures below ₹ 50,000 are denominated by 0.00\*)

## 48 Events occurring after the Balance sheet Date

The Company evaluates events and transactions that occur subsequent to the balance sheet date but prior to the financial statements to determine the necessity for recognition and/or reporting of any of these events and transactions in the financial statements. As of 31st March 2021, there were no subsequent events to be recognized or reported that are not already disclosed.

49 Due to on going impact of COVID-19 globally and in India, the Company has assessed likely adverse impact on economic environment in general and financial risks on account of COVID-19. On long term basis, the Company does not anticipate any major challenge in operating its plants and meeting its financial obligations. Basis above, the management has estimated its future cash flows for the Company which indicates no major impact in the operational and financial performance of the Company. The management, however, will continue to closely monitor the performance of the Company.

## 50 Recent Pronouncements

On March 24, 2021, the Ministry of Corporate Affairs ("MCA") through a notification, amended Schedule III of the Companies Act, 2013. The amendments revise Division I, II and III of Schedule III and are applicable from April 1, 2021. Key amendments relating to Division II which relate to companies whose financial statements are required to comply with Companies (Indian Accounting Standards) Rules 2015 are:

## Balance Sheet:

- Lease liabilities should be separately disclosed under the head 'financial liabilities', duly distinguished as current or non-current.
- Certain additional disclosures in the statement of changes in equity such as changes in equity share capital due to prior period errors and restated balances at the beginning of the current reporting period.
- Specified format for disclosure of shareholding of promoters.
- Specified format for ageing schedule of trade receivables, trade payables, capital work-in-progress and intangible asset under development
- If a company has not used funds for the specific purpose for which it was borrowed from banks and financial institutions, then disclosure of details of where it has been used.
- Specific disclosure under 'additional regulatory requirement' such as compliance with approved schemes of arrangements, compliance with number of layers of companies, title deeds of immovable property not held in name of company, loans and advances to promoters, directors, key managerial personnel (KMP) and related parties, details of benami property held etc.

## Statement of Profit &amp; Loss:

- Additional disclosures relating to Corporate Social Responsibility (CSR), undisclosed income and crypto or virtual currency specified under the head 'additional information' in the notes forming part of financial statements.

The amendments are extensive and the Company will evaluate the same to give effect to them as required by law.
